-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 November 2005.
- 2a) ☐ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 14-21 is/are allowed.
- 6) ☒ Claim(s) 1,2 and 6-13 is/are rejected.
- 7) ☒ Claim(s) 3-5 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 30 September 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 12 recites the limitation "support means" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 7-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Feder (Patent no. 5,628,400). Feder discloses a holder module base including a plurality of first tubes (23), each first tube having a wall with both an outer surface and an inner surface that defines a first passage, see figure 2. The top surface of the tubes defines a first web connecting the outer surfaces of the tube walls to support said first tubes in parallel spaced-apart relation. This space apart relation manifestly permits a fluid, such as air to circulate around and between said first tubes. Instrument supports (24) at the lower ends of the plurality of first tubes for supporting medical instruments placed in said first passages also allows a fluid to circulate through said first passages in as much as is claim.

A cover (34) is shown for seating on said base so as to cover said instruments.

Art Unit: 3728

As to claim 7, the first web comprises a top wall of the base, and further including a peripheral web (20) extending down from said first web around the plurality of first tubes. This peripheral web consisting a side wall of the base as well as defining a seating surface for the cover.

As to claim 8, a plurality of keys are defined by brackets 25

As to claim 9, webs are defined at the bottom surface of the channel 3 which connect at least some of the tubes.

As to claims 10 and 11, the first web consists of a top wall with graphics as shown in figure 2.

As to claim 12, a bridge is defined by adjustable member 33.

As to claim 13 a base bottom is defined by plate 21.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 and 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Feder as applied to claims 1 and 7-13 above, and further in view of Rosler (Patent no. 5,967,318).

It would have been obvious to one of ordinary skill in the art to modify the passages of Feder by constructing upper ends flared as taught by Rosler figures 3 and 4a-c, in order to act as a guide permitting easy placement of the tool within the tube.

As to claim 6, to the extent that Feder does not include inter-fitting seating surfaces on the cover and base, Rosler shows that such a feature is old and well known to those skilled in the container art as shown in figure 1, #15 and #19. It would have been obvious to one of ordinary skill in the art to modify the cover and base of Feder by constructing inter-fitting surfaces as

taught by Rosler, in order to provide a catch more securely retaining the cover in a closed position.

Allowable Subject Matter

7. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 14-21 are allowed.

Response to Arguments

9. Applicant's arguments with respect to claim 1 has been considered but are moot in view of the new ground(s) of rejection.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
